Vegan

Our motto: count nutrients, not calories.

Not all calories are created equal. Some calories are healing, some are harming. Some calories are metabolism-boosting, while others boost blood sugar. The same number of calories from different types of food can influence the body in different ways.

At Freshii, we believe it's important to eat the RIGHT type of calories that energize your body and make you feel GOOD. We follow a nutrient-based approach to eating: our menu is focused on food quality, not quantity. At Freshii we count nutrients over calories, and here's why:

Counting calories can lead to the consumption of the wrong type of calories. Yep, you heard us!

Here's the thing. If you're only keeping the number of calories in mind, it's easy to forget about the other components of food and the effect each can have on the body. Think about a 100-calorie apple versus a 100-calorie candy bar. Viewing them as the same because they hold an equal number of calories can lead us down the wrong path. The candy bar offers no nutritional value, while the apple is loaded with vitamins, minerals and fiber. Natural sweetness for the win!

Counting calories can encourage the restriction of nutrient-dense food.

We've covered foods that contain equal calories, but what about nutritious foods that have MORE calories than "unhealthy" foods? Turns out, some of the most nutrient-dense food on the planet is also the most caloric. Think about avocados, olive oil, nuts and seeds - all contain essential fats, vitamins and minerals to support a healthy weight and metabolism. Trust us, the nutritional benefit from these foods far outweigh the number of calories they contain.

Counting calories ignores food quality.

Another thing to keep in mind? Calorie count doesn't consider whether a food is natural or unprocessed, nor does it distinguish between the type of fat, protein and carbohydrates it contains. Calories from complex carbohydrates, such as whole grains and vegetables, will help to keep blood sugar levels stable and provide the body with sustained energy. Simple carbohydrates, such as refined grains and added sugars, will have the opposite effect. Let's avoid those insulin spikes and cravings!

We'll leave it at this: if you opt for healthy foods that provide your body with the energy and nutrients it needs, you can trust that it will keep you at a healthy weight. However, we also understand that you may have specific health goals that require you to monitor your intake - and that's ok! If you're keeping close tabs on those cal's, check out the following page for some pro-tips from Freshii's Lead Nutritionist!

MORE GREENS, LESS GRAINS

Quinoa and brown rice are known for their impressive health profiles. That said, they can be quite calorie-dense if consumed in large amounts. When ordering your favourite bowl, upgrade to a kale base or opt for half grains, half greens.

PACK ON PROTEIN

Protein-rich foods are highly satiating, leading to reduced hunger and cravings. Be sure to include lean proteins with your Freshii menu items, whether it's chicken, steak, tofu, falafel, hard-boiled eggs or even beans.

DITCH THE DAIRY

Cheese is an excellent source of calcium, but no matter which way you slice it, most cheese is high in calories and fat. If you're mindful of numbers, substitute the cheese for non-dairy sources of calcium such as broccoli or kale.

DON'T GO NUTS

Nuts are packed with nutrients, but they are also packed with calories and (healthy) fats. Incorporate nuts into your daily diet in order to reap their nutritional benefits, however remember that portion control is key here - ask for a half serving!

DRESS LIGHTLY

We prepare our salad dressings fresh in-house with heart-healthy oils. But if you're looking to lighten up a meal, ask for your menu item to be half-dressed. Another tip? Use balsamic vinegar and/or lemon juice in place of dressing.

Looking to reduce the calories of your favourite Freshii menu item? We've got you covered!

COBB

- half dressing:
↓ 100 calories in salad
- ↓ 50 calories in wrap
- remove bacon:
↓ 100 calories

sub blue cheese with red onion:
↓ 90 calories

METABOOST

- half dressing:
↓ 150 calories in salad
- ↓ 75 calories in wrap
- remove almonds:
↓ 100 calories

remove goat cheese:
↓ 80 calories

MARKET

- half dressing:
↓ 100 calories in salad
- ↓ 50 calories in wrap
- remove feta cheese:
↓ 60 calories

sub dried cranberries with broccoli:
↓ 75 calories

PANGO

- half sauce:
↓ 90 calories
- half brown rice, half kale:
↓ 80 calories
- remove aged cheddar:
↓ 80 calories

WAIT, DON'T LOSE THE AVO!

Avocado may drive up the calorie count in a few of our menu items, but let us remind you that the nutritional benefits far outweigh this. Rich in heart-healthy fats, antioxidants and fiber - avocado is a superfood that we don't recommend skipping!

OAXACA

- half sauce:
↓ 60 calories
- remove crispy wontons:
↓ 60 calories
- sub hot beans with cold beans:
↓ 40 calories
